MATHEMATICS UNIT 1: NON-CALCULATOR INTERMEDIATE TIER

THURSDAY, 24 MAY 2018 - MORNING

1 hour 45 minutes

ADDITIONAL MATERIALS

The use of a calculator is not permitted in this examination. A ruler, protractor and a pair of compasses may be required.

INSTRUCTIONS TO CANDIDATES

Use black ink or black ball-point pen. Do not use gel pen or correction fluid.

You may use a pencil for graphs and diagrams only.

Write your name, centre number and candidate number in the spaces at the top of this page.

Answer all the questions in the spaces provided.

If you run out of space, use the continuation page at the back of the booklet. Question numbers must be given for all work written on the continuation page.

Take π as 3·14.

INFORMATION FOR CANDIDATES

You should give details of your method of solution when appropriate.

Unless stated, diagrams are not drawn to scale.

Scale drawing solutions will not be acceptable where you are asked to calculate.

The number of marks is given in brackets at the end of each question or part-question.

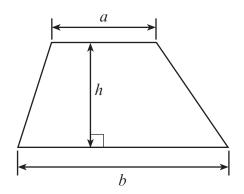

In question 8, the assessment will take into account the quality of your linguistic and mathematical organisation, communication and accuracy in writing.

3. The table below shows some values of y = x - 3 for values of x from -4 to 6.

X	-4	-2	0	2	4	6
y = x - 3	– 7		-3			3

(a) Complete the table above.

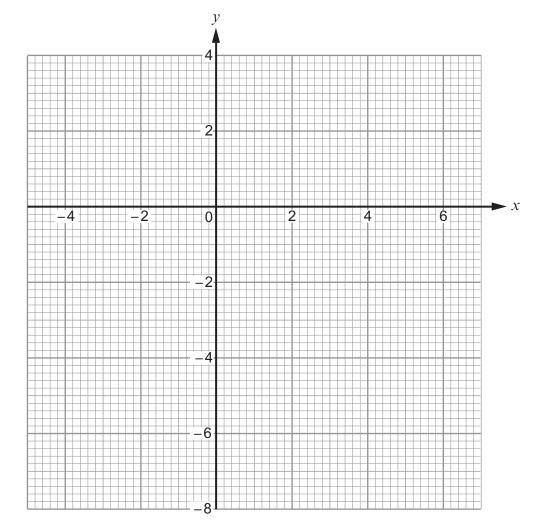

[2]

Examiner only

(b) On the graph paper below, draw the graph of the straight line y = x - 3 for values of x from -4 to 6 only.

[2]

 \dashv

04

	(c)	The straight line you have drawn on the graph for values of x from -4 to 6 is a diagonal of a square.	
		Write down the coordinates of the four corners of this square.	[2]
	((
4.	A bal	g contains a number of different coloured balls. I is selected at random from the bag. probability of selecting a blue ball is 0·3.	
	(a)	Why is the following statement incorrect? Explain your answer clearly.	[1]
		'More than half the balls in the bag are blue.'	
	(b)	What is the probability that a ball selected at random from the bag is not blue?	[1]
	(c)	There are 50 balls in the bag. How many of them are blue?	[2]

Turn over.

(3300U30-1)

The table below shows the first five terms of a sequence of numbers. 6. (a)

Term	t_1	t_2	t_3	t_4	t_5
Value	2	5	8	11	14

Circle the correct equation that connects terms t_6 and t_7 .

[1]

$$t_6 = t_7 + 3$$
 $t_7 = t_6 + 14$ $t_7 - t_6 = 1$ $t_7 = t_6 - 3$ $t_7 = t_6 + 3$.

$$t_7 = t_6 + 14$$

$$t_7 - t_6 = 1$$

$$t_7 = t_6 - 3$$

$$t_7 = t_6 + 3$$

The *n*th term of another sequence is given by 2n - 11. (b)

Write down the value of,

the 10th term,

[1]

(ii)	the	3rd	term

(b)	Solve $\frac{22-f}{3} = 6$.	[3]
(a)	A fair, six-sided dice is thrown twice. What is the probability that a 3 is thrown on both occasions?	[2]

Ξха	mi	ner
0	nly	,

(b) A company has offices in Llanelli, Caernarfon, Newtown and Ebbw Vale. Its national committee is made up of workers from these four offices.

The pie chart below shows what fraction of the committee members come from each office.

There is an equal number of members from Newtown and Ebbw Vale.

A member is chosen at random from this committee to be its chairperson.

(i) The probability that the chosen member works at the Llanelli office is shown in the table below.

Comple	ete 1	the	tabl	e.
